Check out our new documentation site!

At ServiceRocket is it our goal to continually improve and update the documentation that we provide on our products. Updated documentation for all of our add-ons will soon be available and greatly improved.

How to list the WmRoot package in the Developer

Tools

Added by Robert Castaneda, last edited by Nathan Lee on Jan 13, 2005

set the following property in Extended Settings:

```
watt.server.ns.hideWmRoot=False
```

thanks to Jaap! 😊 (A student from our Advanced Integration World workshop in San Diego).

Note: you will need to have Administrator privileges to view the folders of course!.
